

Curriculum Vitae MikeViktorViktor architects

MikeViktorViktor was established in 2006 in Antwerp, Belgium by Bart Melort and Frederic Vandoninck and is specialized in architecture, urban design and landscape design.

Right from the beginning MikeViktorViktor aimed at working on an international level by participating in international competitions and with realizations abroad – such as recent projects in Tirana (AL), Almere (NL), Brooklyn New York (US) and Belgium. MikeViktorViktor is interested in the challenge of complex buildings and wants to pursue its fascination for remarkable designs. Projects are tackled with efficient and sometimes daring solutions.

The partners share a common education as civil engineer-architect and have had the opportunity to do research abroad for their master thesis project. After the master degree, they continued their training at remarkable architecture and engineering offices in Belgium and the Netherlands as well as at the Berlage Institute in Rotterdam.

MikeViktorViktor is used to work in competitive conditions and has the necessary experience in collaborative teamwork. If required MikeViktorViktor architects can rely on a network of partners specialized in the fields of engineering, urban design, landscape design and art.
